---

**Rails(ROR) | Java(SpringBoot) | Ruby | Python | JavaScript | SQL | MongoDB | OOPS | jQuery | BackboneJS | Flask | LLD | MVC | Restful APIs | Postman | Git | Github | Postgress | JIRA | Linux | OOPs | AJAX | TDD**

## WORK EXPERIENCE

---

### Sell.do

Product Engineer (Full-Stack Development)

(From - Feb'22)

- Developed back-end and front-end solutions, managed databases, and integrated APIs.
- Collaborated with PM/senior developers to implement features and resolve technical challenges.
- Work on continuous development and deployment of scalable CRM products, ensuring seamless integration of front-end designs and back-end functionality.
- Implemented background jobs, MongoDB, and SQL efficient queries, benchmarked for insights, enhanced performance, and reduced response times.
- Integrated various third-party applications for data transfer across diverse domains.
- Built RESTful APIs and API filters and tested those APIs using Postman.
- Introduced Bulk Push to Sales module for a key client and developed custom reports using MongoDB aggregation.
- Implemented third-party API integration, managed scheduling and background job processing to optimize task automation and system performance, and solved critical client bugs.
- Conducted thorough code reviews on Reviewable, ensuring adherence to best practices and high-quality code standards.
- Served as Sprint Owner, overseeing the management of Sprint tickets and tasks, ensuring timely delivery of releases. Collaborated seamlessly in sprint planning sessions, translating project requirements into actionable tasks on JIRA.
- Provided training, KT, and guidance to junior team members.

## INTERN EXPERIENCE

---

- **AsGenix Educational Academy**, SIP intern [07/2021 - 08/2021]
